## **NEW AUSTRALIAN STANDARDS AS/5149**

Are you aware of the provisions of the new Australian Standards related to maintenance, environment and safety?

The standards apply to new refrigeration systems along with modifications and extensions to existing systems.

In accordance with the AS/5149 code - **TTRA** are offering our services to undertake a full **COMPLIANCE AUDIT** of your refrigeration plant.

This compliance audit also incorporates a general evaluation of equipment condition including valves, fittings, pipe and insulation.

Such audits should be undertaken every five years combined with an annual visual check.
